From far out in space, Earth looks like a blue ball. Since water covers most of the Earth's surface, blue is the color we see most. We also can see white clouds around it. It is 25,000 miles around! It would take more than a year to walk around the whole planet. Even though spaceships have traveled to the Moon, people cannot visit the Moon without special suits.

The Moon has no air or water. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were six more trips to the Moon.
