
Composition

I like holidays very much. I enjoy my time on holidays. I go to many places. I make useful things. I visit my family. I like playing games. I enjoy reading books and stories. I prepare for my new school year.

Jobs

There are many interesting jobs. The animal trainer trains animals to help disabled people. He has to be patient. He should understand animals. The zookeeper looks after animals in the zoo. The park ranger works in a national park. He has to wear a uniform. He has to be strong and teaches the public. The marine biologist studies marine plants and animals. He has to work outside and be a good swimmer.

Islamic Spain

Spain was under Islamic rule in the Medieval period. The Umayyad dynasty ruled for over 300 years. They made Spain the cultural centre of Europe. Students from all over Europe came to Islamic Spain to study. Muslims introduced many farming techniques to Europe. Arabs brought glassmaking to Europe. The musical instrument came to Europe from the Arab world.

A visit to Spain

Spain is a lovely country. I went to Spain last summer . I went with my family by plane. We stayed for ten days in a hotel. We visited many interesting places like Al-Hambra Palace. I met my pen-friend there. He invited us for dinner with his family. It was a fantastic holiday.

Galilei Galileo

Galilei Galileo is an Italian physicist and astronomer. He was born in Pisa, Italy. He studied medicine in 1581. He formulated the basic law of falling bodies. He built the first telescope. He discovered four moons revolving around Jupiter. He wrote a book about sunspots.

An air traffic controller

An air traffic controller has to be well-trained for his job. The safety of thousands of people depends on him. His first language is Arabic, but he uses English in his job. He should use the correct words. Everyone can understand him. He works in a very busy place. Every minute is important and he has to make decisions very quickly.

An ideal passenger

An ideal passenger should do many things. He should label luggage carefully. He shouldn't accept packages from strangers. He shouldn't pack things like scissors in his hand luggage. He can carry all things he needs for the flight. He should wear comfortable clothes. He doesn't have to use a mobile phone during or after take-off. He mustn't forget or lose his passport.

Taj Mahal

Taj Mahal is an amazing mausoleum. It was built in 1653. It lies in Agra in the north of India. It's one of the seven wonders. Many tourists visit Taj Mahal every year. I like to visit that wonderful place.

Animal Trainer

The animal trainer trains animals. He has to be patient. He has to work with actors and the police. His work is different every day. He never gets bored. He has to be strong and fit. The animal trainer's job is very interesting.

Sabah Al Ahmed Reserve

Last year, we went to a beautiful reserve. In 2004, His Highness the Amir opened it. It

was full of endangered animals. We saw rare birds there. The reserve has beautiful plants and flowers. We had a nice time there.

Al-Idrisi

Al-Idrisi was born in Morocco In 1099. He was a scientist and geographer. He travelled a lot in Europe, Asia and Africa. He collected information about different places. He drew a beautiful map made of silver. He collected and studied plants to make medicine.

Jerash

Jerash is in Jordan. It was ancient was an ancient Roman town. People studied a lot of subjects there. They studied history, geography, astronomy and philosophy. There were chariot races. Gladiators fought wild animals. People used to go to baths at Jerash. They had bread, vegetables, olives, grapes and meat.

Airport

The airport is an important place. Pilots, passport control officer, check-in clerk work there. Planes take off and land on the runway. The air traffic controller has to be well-trained. He uses English in his job. Passenger should take passports, luggage, money and sweets.

Sabah Al Ahmed Reserve

Last year, we went to a beautiful reserve. In 2004, His Highness the Amir opened it. It was full of endangered animals. We saw rare birds there. The reserve has beautiful plants and flowers. We had a nice time there.

Sources of energy

We need energy in our life. There are two types of energy. They are renewable energy and non-renewable energy. Oil, natural gas and coal are non-renewable energy. Sun, water and wind are renewable energy. We use wind power to make electricity. It's a clean energy. We should save energy.

Oil

Oil is a non-renewable source of energy. Oil is a thick black liquid. It is very expensive. It is mad of old dead plants and animals. It's found under the sea or earth. Kuwait is famous for producing oil. We make fuels from oil. Kuwait produces two million barrels of oil a day. Life is difficult without oil.

Natural gas

Natural gas is a non-renewable source of energy. It's found above deposits of oil. It's transported by pipelines. We use it as fuel for lorries and buses. We can turn gas into liquid. We can store it in tanks.

Weather in Kuwait

There are four seasons. They are summer, winter, spring and autumn. Summer is the longest season. It's hot, sunny, dusty and humid in summer. It's cold, cloudy and rainy in winter. Spring is the finest season. People go camping in this cool season. We can see flowers and butterflies in spring. In general, the weather is changeable in Kuwait. You can see three seasons in one day.

Life in the future

Life in the future will be different. There will be electric cars without drivers. Robots will help us. When we give them commands, they obey us. People will read e-books. They will download books to read from the Internet. A mini-computer will be used

like a watch. It will be very useful. Doctors will use virtual reality glasses to cure the patients.

Recycling

Recycling is important in our life. There are many materials. We shouldn't burn old newspapers. We shouldn't throw used bags. We can recycle newspapers, old bags and plastic objects. Glass bottles and plastic containers can be washed and reused. This keeps our environment clean. I think our world would be clean and healthy by recycling.
