# VI- Reading Comprehension and Summary Making (150Marks)

#### Read the following passage carefully, then answer the questions below:

Traffic accidents are considered modern problems, which are causing enormous human and material losses to many people. They lead to various temporary and permanent injuries. It is not an exaggeration to say that victims of road accidents are more than victims of wars and terrorist operations in the world.

There is no denying that car accidents cause needless injury and death, and devastation every year. Driving at a high speed is one of the most prevalent causes of car accidents. It contributes to about a third of all accidents in many places of the world .Distracted driving continues to be the first cause of car accidents .Talking on the phone , reading messages and eating are just some of the ways that make drivers get distracted behind the wheel . **Reckless** drivers cause accidents through their aggressive driving. This may come as a result of improper or excessive lane changing. A car accident may occur because of a defect in a driver's car. Also, disobeying traffic signs may cause accidents.

It is unfortunate that the bad effects of car accidents are linked to the minds of many as material loss, pain and suffering physical disabilities only, but the psychological effects perhaps because of its disappearance of the human eye wasn't paid attention to and was ignored by many other people even by those who linked to researchers in the third world. Scientific researches confirm that some of the road accidents or those who witnessed them could show that they subsequently cause psychological disorders which may develop into severe symptoms.

All governments make efforts to lessen the number of car accidents such as planning and designing roads for safety. In almost all countries, road networks are designed from the perspective of the motor vehicle user. Most important method to bring down accidents is strict enforcement of speed limits. Heavy **penalty** should be imposed on all those who exceed these limits. Although many measures are taken, road accidents still remain a problem which we all need to fight against.
