## II- Grammar

# PAST PERFECT TENSE

The Past Perfect tense in English is composed of two parts: the past tense of the verb to have (**had**) + the **past participle** of the main verb.

**had + past participle**

<b>+</b>	S + had + past participle +...	☞	She had finished.	had not = hadn't
<b>-</b>	S + had not + past participle +...	☞	She hadn't finished.	
<b>?</b>	Had + S + past participle +...?	☞	Had she finished?	

Use	Example
Action finished before another past action	☞ Richard <b>had gone</b> out when his wife arrived in the office.
Action happened before a specific time in the past	☞ Christine <b>had never been</b> to an opera before last night.
Action started in the past and continued up to a given time in the past	☞ We <b>had owned</b> that car for ten years before it broke down.
Cause and effect (combine with past simple)	☞ I got stuck in traffic because there <b>had been</b> an accident.
Emphasize the result of an activity in the past	☞ I <b>had been</b> to London twice by the time I got a job in New York.

**Time Expressions**      already, yet, for, since, just, after, before, until, the moment that...

## Past Perfect Simple

When we arrived at the cinema the film had already started

## 6. The Past Perfect Tense زمن الماضي التام

1) **Formation:** التكوين (كيف نصوغ فعل الجملة في زمن الماضي التام؟)

يتكوّن الفعل في زمن الماضي التام كما يأتي:

**had + past participle (P.P)**  
(التصريف الثالث للفعل)

1.	She <b>had bought</b> a paper.	كانت قد اشترت صحيفةً.
2.	They <b>had met</b> their friends.	كانوا قد قابلوا أصدقائهم.

2) **Usage:** الاستخدام (متى نصوغ فعل الجملة في زمن الماضي التام؟)

إذا وقع حدثان في الماضي في جملة واحدة وسبق أحدهما الآخر، فإن الفعل الأول يوضع في زمن الماضي التام، والذي حدث بعده يوضع في زمن الماضي البسيط.

*After they had eaten* their breakfast, they went to school.

بعد أن كانوا قد تناولوا طعام إفطارهم، ذهبوا إلى المدرسة.

### Do as shown between brackets:

1) The class (start) before John did his homework. (Correct)

4) My father was tired because he (work) all the week long. (Correct)

5) I (have) five different jobs by the time I was 30 years old. (Correct)

نستخدم كلمة wish إذا أردنا التعبير عن حالة نتمنى أنها تتغير. وما بعد wish دائما زمن الماضي ولكن كل زمن له تعبيره حسب التالي :

**with + simple past** : بهذه الحالة نحن نتمنى ان يكون الموقف متغيرا اما بالحاضر او المستقبل. وكمثال :

I wish I spoke English.

انا أتمنى أن أتكلم الإنجليزية. في الحقيقة : أنا لا أتكلمها.

**wish + past continuous** : وهنا نستخدم الماضي المستمر للتعبير عن حالة نعيشها الآن ونتمنى أنها مختلفة. مثال :

I wish it was not raining

انا أتمنى انها لم تمطر. في الحقيقة : هي تمطر الآن.

**wish+ past perfect** : نستخدم الماضي التام اذا تحدثنا عن أمر انتهى بالماضي ولم يعد له استمرار لحاضرنا. ( انتهى )

I wish I had not eaten so much

أنا تمنيت اني ما أكلت كثير. في الحقيقة : أنا أكلت كثير.

### Wishes about the present and future

*wish + past simple is used to express that we want a situation in the present (or future) to be different.*

- I wish I spoke Italian. (I don't speak Italian)
- I wish I had a big car. (I don't have a big car)
- I wish I were on a beach. (I'm in the office)
- I wish it were the weekend. (It's only Wednesday)

- I wish they'd come on holiday with us. (They didn't come on holiday)
- I wish I had studied harder at school. (I was lazy at school)

(\*In formal writing, you will see 'were' instead of 'was' after wish. This is correct, but it's also fine to use 'was', in the same way as with the second conditional.

'I wish I were rich' or 'I wish I was rich'.')

# the third conditional

## The Third Conditional

We make the third conditional by using the **past perfect** after 'if' and then 'would have' and the **past participle** in the second part of the sentence:

- if + past perfect, ...would + have + past participle

It talks about the past. It's used to describe a situation that didn't happen, and to imagine the result of this situation.

- If she **had studied**, she **would have passed** the exam (but, really we know she didn't study and so she didn't pass)
- If I **hadn't eaten** so much, I **wouldn't have felt** sick (but I did eat a lot, and so I did feel sick).
- If we **had taken** a taxi, we **wouldn't have missed** the plane
- She **wouldn't have been** tired if she **had gone** to bed earlier
- She **would have become** a teacher if she **had gone** to university
- He **would have been** on time for the interview if he **had left** the house at nine

### III- Reading Comprehension

#### Read the following passage and answer the questions below:

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also reduces pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

#### A- Choose the correct answer from a, b, c and d:

- 1) What is the main idea of the last paragraph?
  - a) wood lasts longer than plastic
  - b) plastic lasts longer than wood
  - c) plastic will not be recycled in the future

- 2) What is the opposite of the underlined word “**reduces**” in the second paragraph?
  - a) lowers
  - b) increases
  - c) bounces
  - d) absorbs

- 3) What does the underlined pronoun “it” in the third paragraph refer to?
- energy
  - fuel
  - time

  - persuade us plastic in the future.
  - clarify that recycling is a good way to use trash

## Reading Comprehension

### Read the following passage and answer the questions below:

On Fridays, I always enjoy driving into the countryside. The weather **there** is usually fantastic with a fresh breeze blowing here and there. It is a good straight road with some pleasant views of the countryside on either side. There are woods, for example, hills, small villages and a very large lake. And because there is rarely much traffic on the road, I can enjoy the view as I drive there.

One morning, as usual, while I was driving, I was rather annoyed when a small ancient green car began to drive close behind me. I went a little faster, hoping to leave the car behind. But the problem was that whenever I slowed down, the green car caught up with me. The driver of that car, a middle-aged man with a black cap on his head, was waving to me. However, I didn't **recognise** either him or his car.

Here, I had no choice but to drive a little faster. But whenever I slowed down, it tried to catch up with me. "Perhaps I am doing something wrong." I said to myself. I checked everything in the car but everything was in order and I had not got a puncture. "This man must be mad." I thought, feeling rather angry. Then, I drove fast leaving the green car behind me. I didn't slow down until I got to my destination.

There were some traffic lights just before I crossed the rail way bridge into the village and the lights turned red as I approached. I was still waiting there when the little car caught up with me. The driver got out of the car and tapped on my window. I opened it. "Can I help you?" I asked rather coldly. "I am trying to help you!" said the man. "You see; your number plate fell off about fifteen miles back. I tried to attract your attention, but you didn't take any notice. "

Although he invented the game of basketball at Massachusetts, USA, Dr. Naismith was a Canadian. Working as a physical education teacher at Springfield College, Dr. Naismith noticed a **lack** of interest in exercise among students during the wintertime. The New England winters were fierce, and the students refused participating in outdoor activities. Naismith determined that a fast-moving game that could be played indoors would satisfy **them** after the baseball and football seasons had ended.

In December of 1891, Dr. Naismith hung two old peach baskets at either end of the gymnasium at the school, and, using a soccer ball and nine players on each side, organized the first basketball game. The early rules allowed three points for each basket and made running with the ball a foul. Every time a goal was made, someone had to climb a ladder to get the ball back.

Nevertheless, the game became popular. In less than a year, basketball was being played in both the United States and Canada. Five years later, a championship was held in New York City, which was won by the Brooklyn Central team. The teams had already been reduced to seven players, and five became standard in the 1897 season. When basketball was introduced in the 1904 Olympic Games in St. Louis, it quickly spread throughout the world. In 1906, a metal circle was used for the first time to replace the basket, but the name basketball has remained.

**Read the following passage carefully, then answer the questions below:**

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.
