II - Reading Comprehension :-

Read the following passage, then answer the questions below:- (234words)

Every day there is less and less space on Earth for trash to be buried. Yet, every day we make more and more trash and waste that have negative effect on the natural environment. What can we do? We can recycle some of our trash. Recycling means that the trash will be made into something new and useful that can be used again and again.

Recycling helps the Earth in many ways. It saves space in trash dumps where trash is collected to be burnt. Half of everything that we put into dumps could be recycled instead of throwing it. In fact, most things which are made of paper, metal, aluminum, glass and plastic can be recycled. It also **reduces** pollution.

Paper can be grouped up and made into new paper. Steel and aluminum cans can be melted down and made into new cans. The same is true about glass bottles. This can be done over and over again. Recycling doesn't take as much energy as making these things the first time. So, by recycling we can use less of the Earth's fuel resources. **It** also helps save our natural resources such as wood and metals.

Plastic can be melted down, too. Then, it can be formed into park benches or furniture. Some people call plastic the wood of the future. Things made of plastic will last about 400 years even when they are outside in harsh weather. No wood can do that.

When Fulton moved back to the U.S., he took his steamboat invention and established the first steamboat service in the world on the Hudson River in New York. People paid money to travel by steamboat. Reading comprehension

Read the following passage, then answer the following questions below:

From far out in space, Earth looks like a blue ball. Since water covers three-fourths of the Earth's surface, blue is the colour we see most. The continents look brown, like small islands floating in the huge, blue sea. White clouds **wrap** around the Earth like a light blanket. The Earth is shaped like a sphere, or a ball. It would take years to walk around the whole planet.

A spaceship can fly around the widest part of the sphere in only 90 minutes.

Even though spaceships have travelled to the Moon, people cannot visit the Moon without special suits. The Moon has no air or water. Plants and animals can't live there either. Astronauts first landed on the Moon in 1969. After that, there were six more trips to the Moon. They brought back Moon rocks, which scientists are still studying.

The Sun is the closest star to Earth. A star is a hot ball of burning gas. The Sun looks very big. But the Sun is just a medium-sized star. The burning gases from the Sun are so hot that they warm the Earth. Even though the Sun is always glowing, the night here on Earth is dark. That's because the Earth turns around, every 24 hours. During the day, the Earth faces the Sun. Then we see light. During the night, the Earth turns away from the Sun. Then **it** faces the darkness of space. Each day we learn more about the Earth, the Moon, and the Sun.
