a- surrounded                      b- narrow                      c- pleasant                      d- sticky

## Reading Comprehension

### Read the following passage then answer the questions below:

We have five senses that help us learn about the world around us. They are; tasting, seeing, touching, smelling, and hearing. These senses usually work together to give us a clear picture of all things. If one sense is not working because of an illness, then the other senses will be stronger to make up for the missing one. Teeth are strong because they have to keep working for many years. Healthy gums are also very important. **They** help to hold our teeth in place. If you want to keep your teeth and gums healthy, you shouldn't eat too much sweets or sticky food. We have four types of teeth, and each one has a special function. The first type is **sharp**. We use it to bite food. The second type is to tear food. The third and fourth types have flat tops to grind food.

### A) Choose the correct answer from a, b, c or d:

1- The best title for the passage is:

- |                     |                          |
